

Call for new Research Groups

The Instituto de Investigação e Inovação em Saúde (i3S) welcomes applications from outstanding scientists to establish new independent Research Groups.

FAQ's

Salary is not included?

It is not. This is a Call for new Research Groups, not for individual positions.

What exactly means that "approval of the application does not automatically entail successful candidates to a research position"?

In the event that you do not have already a position and need salary support you can apply to a call for research positions that will soon be open at i3S or to other calls promoted by FCT or EC, for instance.

What is the average value of start-up package you are offering?

Regarding Institutional support, no start-up package is foreseen, besides laboratory space and access to state-of-the-art facilities.

Is the number of pages of the full cv included in these 10 pages and, if it is not included, it will be possible to submit the full cv in a separate field?

The cv of the group leader is not included in the 10 pages. However, we suggest that the cv does not exceed 5 pages.

The cv can be uploaded as a separate file.

Can the period of 10 years after the doctorate, be extended by maternity leave?

The 10-year period referred may be extended at the request of the candidate, when based on suspension of scientific activity for socially protected reasons, namely, for reasons of parental leave, prolonged serious illness, and others legally protected situations of unavailability for work.

Does successful postdoctoral experience mean that people with a just awarded PhD are not eligible?

Candidates must have completed a postdoctoral study in which they have demonstrated the ability to carry out high quality research, publish in top specialized magazines and have acquired skills such as co-supervising master's students and, if possible, doctoral students. In short, candidates have to demonstrate that they have managed to develop their scientific path so that they can be considered as ready to start an independent research career.
